

Received 10/7/03

Hello My name is Deon E. Adams, Sr

I feel that my ideal will work with all of your ?!?!?!?

The Big Picture: The Estuary's Role In statewide water Management.

The Estuary and Southern California-Developing a Reliable Water supply Portfolio.

Californians can keep water in the Estuary AND meet future demands by water recycling.

Can we pump more water from the Estuary AND still protect the ENVIRONMENT?????

AN Environment Perspective

An Agricultural Perspective

How do we resolve these issues and move forward???????

Central valley River Ecosystems: Are floods really water "wasted" to the sea?????

The Protection of the Estuary's Native Aquatic Specie : Can we separate influences of Human activities from effects of natural cycles ?????

The Estuary and California Water Management-Can we support California's

Growing economy with a new approach to water management??????

The 2003 California water Plan (Bulletin 160 ) a water Plan for California for the next five years

The role of the California Legislature in water Management and the san Francisco Estuary

How can I market My ideal?????
